Yum! That was easy!

We've sent a link to set up fantasicfun.pbwiki.com to cjbaedke@yahoo.com. If you want to use a different email address just go back and sign up again. We don't actually save the wiki for you until you verify your email.

What to do if your confirmation message doesn't show up:

- **Check your spam folder.** Sometimes the email can get accidentally routed to your spam folder. We're grumpy about this, too.
- **Wait a few minutes.** While we've already sent your email out, some mail providers can take as long as half an hour to get around to putting it in your inbox. Gack.
- **Try again with a new address.** This will solve the problem most of the time. Just use a different email address (you can use the same wiki name). Gmail seems to work pretty well, for instance.

While you're waiting for that email, why not watch this quick video — it will help you get acquainted with PBwiki.

- Your "verification" will be sent to your eMail address. This may take a few minutes so take this time to watch a quick overview tutorial on that page. If you do NOT get a verification - follow directions in the window and RESEND using another eMail address. Some eMail accounts put verification messages in the trash, SPAM folder, or may even deny delivery. You should know if you are authenticated in about 30 minutes.
- Click on the link in your eMail and you will be sent to Step 3 - picking a password.

Just 3 steps to using your PBwiki

Pick a password

You'll use this to log into your wiki. If you'd like to let friends edit your wiki, you can also share this password with them.

Pick a password:	<input type="password"/>
Confirm password:	<input type="password"/>

What's this wiki for?

Will your wiki be public or private?

Make my wiki public — strongly encouraged. Public wikis make it easy to collaborate, and a password is **always** required to change your wiki.

Subject: Invitation to my wiki 'templates'

Hi!

I made a PBwiki, and would like to share it with you.

A wiki is an easy-to-use Web page that lets you collaborate with other people--no special knowledge required. It's unbelievably easy to use. You just start typing! This is useful because it allows us all to create new pages, make links to pages we've already made, and let others edit the wiki, too. We can all add to this wiki.

This link will take you to the wiki and allow you to create and edit pages and add to discussions.

Sent by PBwiki on behalf of cjbaedke@yahoo.com

- A verification alert will show you who is receiving your invitation.

| Share your wiki

Great! We've invited these people to contribute to your wiki:

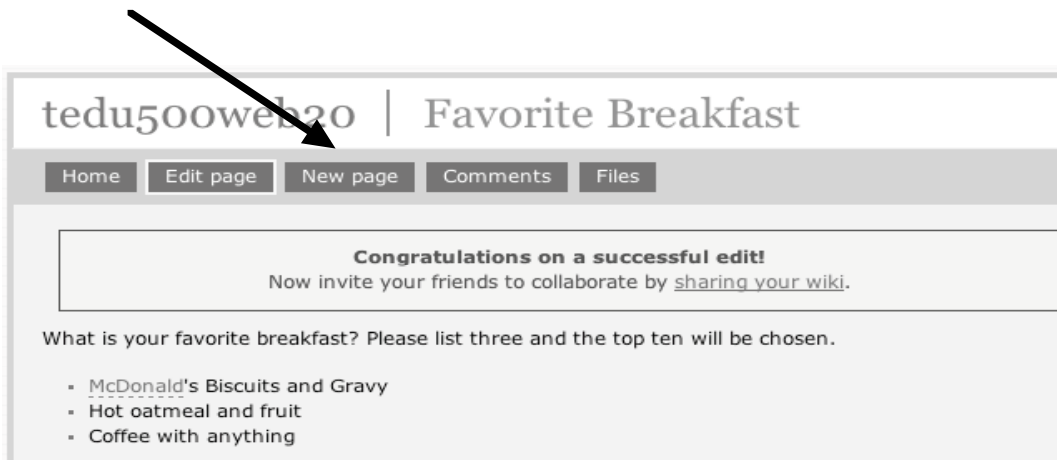

- alias@yahoo.com,
student@yahoo.com

Now what? [Share this wiki with more people](#) -or- [Back to your front page](#)

- Click "Back to your front page" to begin setting up your topic.

- Click on "New page" and begin setting up your topic.

- "Edit page" allows you to edit or add more information to the original.
- "Comments" appear at the bottom of the page and do not affect the original.
- All entries are noted by name, date, and time at the bottom of the page.
- There are some "styles" that you can add so PLEASE explore.

The application of this tool - both personally, professionally, and in the classroom are endless. The friendly interface of PBwiki has not been matched for ease of use and support by tutorials, guides, and more. Have fun and start exploring!
